

## ***Inline Processing***

Bespoke automated processing

Create greater efficiencies by  
streamlining your routine  
processing tasks

## meta-morphix Inline

### What is it?

meta-morphix Inline is fully automated data processing without any human involvement. It offers the client bespoke data cleansing via secure FTP. It gives clients access to the following features:

- Inline processing is available 24 hours a day, 365 days a year
- On demand processing, no scheduling necessary
- Completely customisable to the client requirements
- Inline offers all essential existing bureau processing capabilities
- Multiple levels of cleansing that can be selected on a job by job basis
- Inline is fully automated
- Secure data delivery an integral part of the service

### How does it work?

In order to develop an Inline process that works for you our highly experienced sales and account management team will develop a bespoke solution based on a number of key factors including the volume of data to be processed, desired layout and service requirements for example address enhancement, relocation, suppression and telephone number appends.

Once the file has been uploaded to the meta-morphix FTP site Inline will automatically process the files according to the client's unique requirements. The client will be emailed a report with details of all suppressed records, internal duplicates, PAF rejects etceteras and the output will be placed on the meta-morphix FTP for downloading.

Clients will receive email notification of any errors or anomalies that occur during processing.

### Inline overview
