

Ticketmaster is the largest ticketing agency in the UK and Scientia Data is the sole re-seller of its wide-reaching and highly selectable database. Target fun and sociable individuals who enjoy spending their leisure time at concerts, the theatre and many other type of events and activities. Utilise the many data selections such as source of booking and event type to drill down to those people who are likely to be most responsive to your offer.

Fresh Data:

Ticketmaster data is collected from their customers when they buy event tickets, either online or by phone. Established in 1976, Ticketmaster is the world's leading live entertainment ticketing and marketing company; in 2007 Ticketmaster sold more than 141 million tickets on behalf of its clients. The file is updated monthly, with every record PAF verified and MPS cleaned. Incomplete records are removed, along with any that have provided a business or overseas address.

Counts and Data Delivery:

We make it our aim to deliver efficient and outstanding account management and customer service. If you work to tight deadlines, we'll work to tighter ones. Generally we ask for 24 hours on basic data counts (48 hours for previous order exclusions or more complex counts) and 3 days for data delivery. However, if you're in a rush give us your deadline, we'll do everything we can to meet it.

Ticketmaster Postal Data is available through the Media Management division of Scientia Data:

We offer a friendly and professional approach to business, underpinned by extensive experience and in-depth knowledge of the direct marketing industry – all of which enables us to deliver a superior level of service and account management to our customers. Our clients tell us this is what differentiates us from our competitors and why they continue to come back time and time again.
